PROFESSIONAL SUMMARY

AI-Ready Java Full Stack Developer with 4+ years of enterprise experience building scalable, cloud-native applications using Java 17+, Spring Boot microservices, React.js, Angular, and AWS. Proven impact across financial services (Citibank OneCMS) and logistics: 35% API latency reduction, 40% throughput improvement, 60% QA automation savings, 50% faster infra provisioning. Deep expertise in OAuth2/JWT, Docker/Kubernetes, Apache Kafka, Elasticsearch, micro-frontend architecture, and RESTful API design. M.S. Computer Science, NJIT (GPA 3.40). AWS Cloud Practitioner certified. Proficient with GitHub Copilot, Amazon Q Developer, and KIRA to deliver production-ready code at speed.

TECHNICAL SKILLS

Languages: Java 17+ · JavaScript (ES6+) · TypeScript · Python · R · SQL · Bash/Shell

Frameworks: Spring Boot · Spring MVC · Spring Security · Spring Cloud · Spring Data JPA · Hibernate · React.js (v18, Hooks, Redux) · Angular · Node.js · Express.js

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, API Gateway, ECS/EKS, CloudWatch, IAM, SQS, SNS, Bedrock, Amplify) · Docker · Kubernetes · Jenkins · GitHub Actions · TeamCity · UDeploy · Maven · Gradle · Nginx

Databases: PostgreSQL · Oracle · MySQL · MongoDB · Redis · Elasticsearch · SQL Server

Architecture: Microservices · Event-Driven Architecture · RESTful & GraphQL APIs · OAuth2/JWT · Apache Kafka · Micro-Frontend · Module Federation · SOLID · DDD · Design Patterns

Testing & QA: JUnit 5 · Mockito · Selenium WebDriver · TestNG · Cucumber (BDD) · TDD · Integration Testing · Postman · SonarQube

Data & AI: R (dplyr, ggplot2) · Tableau · Power BI · ML Fundamentals · GitHub Copilot · Amazon Q Developer · KIRA (Financial AI) · Tabnine · AWS Bedrock · AWS Cloud Practitioner

PROFESSIONAL EXPERIENCE

Software Engineer | Java Full Stack · EvagTech Inc.

California, USA | June 2025 – Present

- Architected cloud-native enterprise logistics platform on Java 17+/Spring Boot deployed to AWS (EC2, ECS, S3, RDS, Lambda, API Gateway, CloudWatch); achieved 35% API latency reduction and 40% throughput improvement under high-concurrency production load.
- Built React.js (v18) SPAs with Hooks, Context API, and Redux; implemented WebSocket-based real-time shipment tracking with live inventory alerting, improving operational visibility for business stakeholders.
- Secured all RESTful APIs with OAuth2/JWT and RBAC; integrated Redis distributed caching and Elasticsearch full-text search; designed Spring Data JPA/Hibernate ORM across PostgreSQL, Oracle, MySQL, and MongoDB.
- Containerized microservices with Docker/Kubernetes and automated CI/CD pipelines via Jenkins and GitHub Actions with quality gates; cut infrastructure provisioning by 50% and enabled zero-downtime deployments.
- Built Selenium WebDriver + JUnit 5/Mockito automation suite (TDD/BDD, Cucumber); reduced manual QA by 60%, maintained 85%+ regression coverage, enforced code quality via SonarQube.
- Leveraged GitHub Copilot, Amazon Q Developer, and Tabnine for AI-assisted development and code review; reduced boilerplate by ~30% and consistently accelerated sprint delivery.

Associate Engineer | Java Backend (Financial Domain) · Virtusa Pvt. Ltd. · Client: Citibank

Chennai, India | December 2021 – August 2024

- Built and maintained Java 17+/Spring Boot microservices on Citibank's OneCMS mission-critical global platform, supporting real-time banking operations and financial data processing across international distributed teams.
- Developed secure RESTful APIs with Spring Security and Spring Data JPA/Hibernate; enforced OAuth2/JWT patterns and PCI-DSS/SOX compliance standards for financial services.
- Built Angular (TypeScript, HTML5, CSS3) micro-frontend UI components for OneCMS modules; delivered responsive financial dashboards aligned with Citibank's enterprise design system.
- Integrated Apache Kafka producers/consumers for async event-driven banking workflows; optimized Oracle/MySQL JPA queries via execution plan analysis and indexing strategies for high-frequency transaction processing.
- Enhanced CI/CD pipelines (TeamCity, UDeploy, Bitbucket) with automated regression validations; reduced production defect rates and streamlined enterprise release cycles across global banking operations.
- Mentored 4 junior engineers on Java architecture, Spring Boot, SOLID principles, Kafka, REST API design, and Agile/Scrum, directly improving team throughput and overall code quality.

PROJECTS

- Personal Portfolio Website** | React.js · Node.js · JavaScript · AWS · GitHub Actions: Full-stack portfolio site deployed on AWS with automated CI/CD via GitHub Actions, demonstrating end-to-end DevOps ownership and cloud delivery.

CERTIFICATIONS

- Oracle Certified Associate, Java SE 8 Programmer (OCA)** · Oracle University · January 2022 · Credential ID: 290172045OCAJSE8
- AWS Certified Cloud Practitioner** · Amazon Web Services · 2024

EDUCATION

M.S. Computer Science · New Jersey Institute of Technology (NJIT) · GPA: 3.40 / 4.0 · December 2025

Coursework: Data Structures & Algorithms (A) · Web Systems Development (A) · Database Systems Design · Cryptography & Security · Machine Learning · Data Mining · Network Protocols · Data Visualization
